# 1. Introduction

# Introduction

The Americans with Disabilities Act of 1990 (ADA) is a civil rights statute that prohibits discrimination against people who have disabilities. Title II of the Act specifically addresses the subject of making public services and public transportation accessible to those with disabilities. Agencies are required to develop a Transition Plan to address any ADA deficiencies.

This document will become an Appendix to the Lee County ADA Transition Plan, which is currently being developed. This document serves as a summary report for the deficiencies which have been identified at Lee County Department of Transportation maintained intersections. All assumptions are listed in this report and have been developed through coordination between Atkins and Lee County Department of Transportation.

The following report is structured as follows:

## **Project Area Development**

This section reviews the development of the project area for the LCDOT ADA Transition Plan. It also discloses how the project area was prioritized for the order of inspections.

## **Final Project Area**

This section presents the list of the final project area that was identified.

## **Evaluation Criteria**

This section documents the criterion that was identified in order to assess compliance of the project area with ADA accessibility.

## **Data Collection**

This section reviews the processes that were taken during field inspections as well as the quality control.

## **GIS Database**

This section summarizes the development of the geographic information system (GIS) database which is submitted electronically in conjunction with this report.

## **Analysis of Data**

This section presents the process which was taken in order to prioritize the types of ADA deficiencies, rank the intersections by their degree of non-ADA compliance, and generate the final recommendation reports which summarize the improvements needed at each intersection within the project area.

## **The Next Steps**

This final section suggests subsequent tasks which should be considered during the ongoing development of the Lee County ADA Transition Plan.

## **2. Project Area Development**

# Project Area Development

## Development of Project Area

Atkins developed a project area for the ADA Transition Plan for the Lee County Department of Transportation (LCDOT). This section outlines the methodology taken in developing the inspection locations.

The project area is comprised of existing signalized intersections owned or maintained by Lee County. Additional un-signalized intersections were also included as documented below.

Atkins utilized the following reference documents in determining the project area:

**Table 2-1 Reference Documents**

| <b>Location</b>    | <b>Description</b>                                    |
|--------------------|---|
| Appendix A – Map 1 | Lee County DOT Map of Functional Classification       |
| Appendix A – Map 2 | Lee County DOT Map of Major County and State Roadways |
| Appendix A – Map 3 | Lee County DOT Crash Reports, dated 2009              |

Utilizing the Lee County Traffic Signal ArcGIS shape file, a list of all County owned signalized intersections of arterial roadways with arterial or major collector roadways was compiled.

Next, a list of all County maintained un-signalized intersections of arterial or major collector roadways with arterial or major collector roadways within Lee County was compiled. The owners of each of these intersections were determined by using Map 2 in conjunction with Map 3.

Additional criterion was utilized to determine whether the aforementioned locations should be excluded from proceeding to the data collection phase. Such criteria included:

- Intersections within Capital Improvement Project limits that are currently in construction (See Appendix A - Figure I)
- Intersection located within limited access R/W (I-75 ramps)
- No sidewalk connectivity on any legs of intersections within 500'

The intersections that have been excluded due to these criteria are tabulated in Appendix A – Table 1 along with the description of why they have been excluded.

## Prioritization of Project Area

In order to prioritize both the order of inspections as well as the implementation of improvements, the project area was then divided into a hierarchy of groups. This process began by categorizing each intersection within the project area as urban, suburban, or rural based off of the existing Lee County Draft Future Land Use map (Appendix A – Map 4). Atkins assumed all county maintained intersections identified in the project area that fall within incorporated cities as urban classification, since these areas are not identified on the Lee County Future Land Use map.

Next, these intersections were ranked by their proximity to the following:

1. Within 2 miles of an urban elementary school
2. Within  $\frac{1}{2}$  mile of an urban middle school
3. Within 2 miles of a suburban elementary school

4. Within  $\frac{1}{2}$  mile of an urban high school
5. Within  $\frac{1}{2}$  mile of a suburban middle school
6. Within  $\frac{1}{2}$  mile of a suburban high school
7. Within  $\frac{1}{2}$  mile of a rural school
8. None of the above

Lastly, these intersections were grouped by proximity to one another. These assigned groups and “Priority Rankings” are shown on Appendix A - Figure 2 – Intersection Survey Priority Map.

A list of intersections that encompass the final project area are shown in **Table 3-1: Project Area**. Each signalized intersection is identified by the respective Lee County signal ID number and each un-signalized intersection has been assigned a unique number.

### **3. Final Project Area**

# Final Project Area

Table 3-1: Project Area

| ID    | Roadway                   | Intersecting Roadway           | Priority Ranking |
|-------|---------------------------|--------------------------------|------------------|
| 3907  | Daniels Parkway           | Gateway Boulevard              | 1                |
| 6216  | Lee Boulevard             | Sunshine Boulevard             | 1                |
| 6218  | Gunnery Road N            | 12 St W                        | 1                |
| 6219  | Gunnery Road              | Lee Boulevard                  | 1                |
| 6223  | Gunnery Road S            | 23rd Street SW                 | 1                |
| 10034 | 12th Street W             | Sunniland Boulevard            | 1                |
| 10035 | 12th Street W             | Sunshine Boulevard             | 1                |

## **4. Evaluation Criteria**

# Evaluation Criteria

## Criteria

In-field inspections of the identified project area helped to identify all physical obstacles that limit the accessibility of facilities to individuals with disabilities. Evaluation criterion was developed to assess compliance of intersections with ADA accessibility. ADA deficiencies within the limits of the signalized intersection (and a buffer of 100' from the intersection along each leg) were developed from the following documents:

- 2010 Standards for Accessible Design, published by the Department of Justice
- ADA Accessibility Guidelines (ADAAG, 2004)
- Manual for Uniform Traffic Control Devices
- Public Rights of Way Accessibility Guidelines
- DOT's ADA Standards for Transportation Facilities (2006)
  - Section 400 (curb ramps)
  - Section 705 (detectable warnings)

The following inspection criterion was approved by County staff for data collection:

### Sidewalks

- Width, continuous and unobstructed (48" minimum)
- Clear width to obstructions (36" minimum at pinch point)
- Cross slope (perpendicular to direction of travel, 2% maximum)
- Grade away from intersection (8.33% maximum)
- Landing present (dimensions 48" x 48" minimum)
- Material (concrete, asphalt, other)
- Condition (good, cracked, shattered)
- Change in level surface along sidewalk (1/4" maximum)
- Drop offs in front of or behind sidewalk (4" maximum)
- Missing sections or gaps along sidewalk (1/2" maximum)
- Gaps aligned parallel to direction of travel
- Overhead obstructions (84" minimum)
- Also documented were sites where there are no existing pedestrian pathways

### Curb Ramps

Note – some intersections within the project area did not utilize curb and gutter. In these instances, the landings at the flush transitions of the street crossings were analyzed.

- Detectable warnings
  - Present
  - Material (rubber, plastic, stamped, other)
  - Color (black yellow, red, other)
    - Detectable warning surfaces shall contrast visually with adjacent walking surfaces either light-on-dark, or dark-on-light
  - Extend full width of ramp (exclusive of flared slopes)
  - Measure 24" minimum from back of curb
- Ramp cross slope (2% maximum)
- Ramp grade (maximum 8.33%, for curb ramps constructed after January 26, 1992)
- Ramp width (48" minimum)
- Ramp within marked cross walk
- Curb ramp flare slope (maximum 8.33%)

- Poles/pull boxes located within ramp
- Gutter slopes less than 5% (If the counter slope of a curb ramp exceeds 5 percent, the rate of change of grade is likely to exceed 13 percent, depending upon the grade of the ramp)

## **Driveways**

- Number of driveways crossing sidewalk
- Cross slope crossing sidewalk (2% maximum)
- Condition (good, cracked, shattered)
- Material (concrete, asphalt, other)

## **Crosswalks**

- Width parallel to traffic (6' minimum)
- Cross slope parallel to traffic (2% maximum)
- Pavement marking type (standard, special emphasis, other)
- Pavement marking material (thermoplastic, paint, other)
- Pavement marking condition (good, poor, other)
- Clear space of 48" at bottom of diagonal curb ramps within crosswalk markings

## **Medians**

- Median width
- Whether a refuge is provided within the median
- Refuge width
- Refuge surface material (concrete, asphalt, sod, other)
- If detectable warnings are present within median

## **Refuge Islands**

- If detectable warnings are present within the refuge island
- Width of main crosswalk to refuge island
- Width of minor crosswalk to refuge island
- Pavement marking type of minor crosswalk (standard, special emphasis, other)
- Pavement marking condition of minor crosswalk (good, poor, other)
- Ramp slopes within island (maximum 8.33%)
- Ramp cross slopes within island (2% maximum)

## **Lighting**

- If intersection lighting is present

## **Pedestrian Signals**

- Pedestrian signal heads present
- Type of pedestrian signal head (countdown, standard, audible)
- Push buttons present
  - Within 120" of other pushbuttons
  - Within 60" of applicable crosswalk line
  - Within 30" to 120" from curb line
  - Sidewalk to push button distance (15" maximum reach)
  - Parallel to direction of crossing
  - Clear level space of 30" x 48" at button
  - Height from sidewalk to center of button 42" – 48"

- Operable buttons
- Accessible buttons
- Signs present
- Type (standard, tactile)

#### **Obstructions in sidewalks, crosswalks, or curb ramps**

- Signs
- Mailboxes
- Fire hydrants
- Benches
- Telephone pedestals
- Traffic signal controller boxes
- Newspaper boxes
- Drainage structures
- Tree grates
- Pole mounted objects
- Standing water

## 5. Data Collection

# Data Collection

## Inspections

In order to ensure continuity amongst inspectors, an official “ADA Transition Plan Inspection Process” document was created and in-field training with inspectors held. This document can be found in Appendix B – Figure 1.

The primary equipment utilized by each inspector to conduct the inventory at each intersection included:

- iPad
- Camera with GPS capabilities
- Measuring tape
- Measuring wheel
- Smart level
- Safety Vest
- Template sketch (sketch of intersection geometry, found in Appendix B – Figure 2)
- Hard copy of data template (in the event the iPad is out of service, found in Appendix B – Figure 3)
- ADA Transition Plan Inspection Process instructions

Inspections were conducted in order of Priority Ranking as described in Section 2 of this report. Field inspections took place from December 2013 – January 2015. The data collected for each intersection underwent the following quality control (QC) process.

## Quality Control Process

Quality control (QC) measures were continually implemented to ensure that data collected was accurately represented. The numbers.zip file of each intersection was opened within iCloud in order to verify and/or update the information submitted by the inspectors.

Photographs assisted in the review of accuracy of data input. The QC process also confirmed that the ESRI data was input correctly and the orientation of the photos had been corrected as dictated in the official “ADA Transition Plan Inspection Process” document.

Once the files were verified and/or updated, they were input into the geodatabase by Johnson Engineering.

## 6. GIS Database

# GIS Database

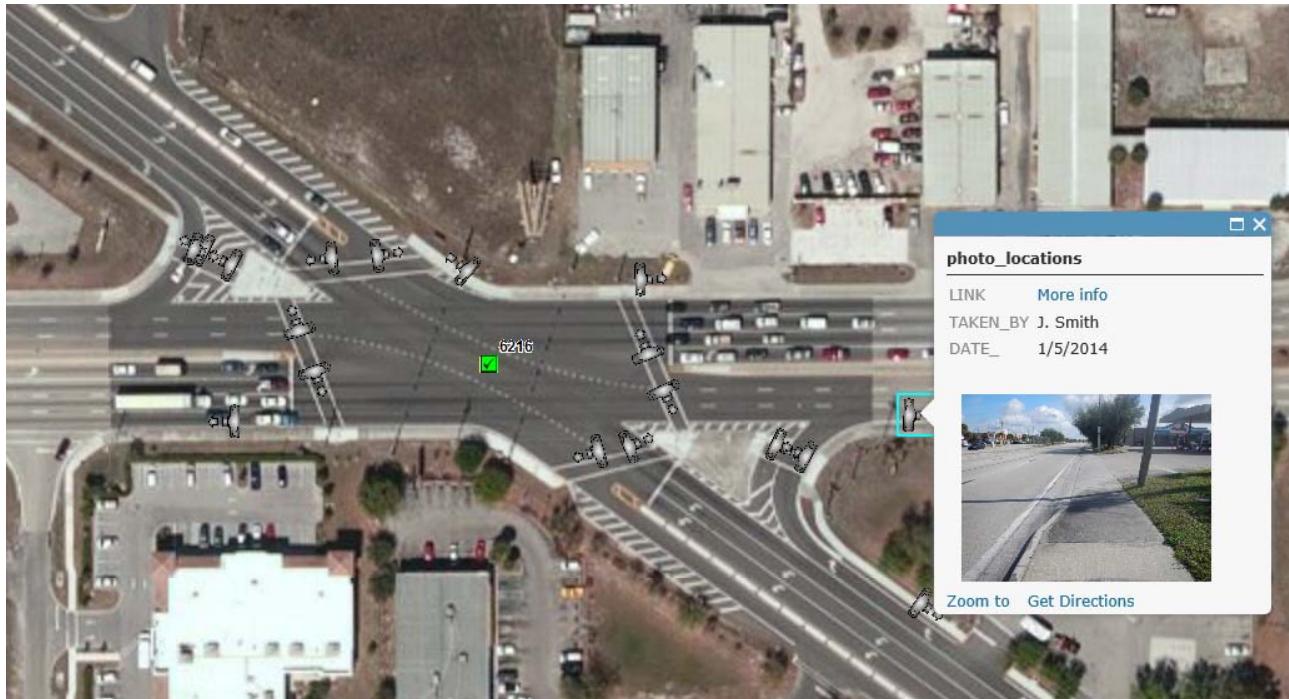

## Geodatabase Input

The Lee County ADA Transition Plan utilized as ESRI geodatabase designed to house the data related to each inspected intersection.

The database serves as an ongoing tool to be used by County staff to track and manage ADA intersection and sidewalk information on an ongoing basis. The various features that have been set up in the submitted database have the ability to hyperlink fields for associated documents from the County's server for use by Lee County staff.

The photos taken during inspections were taken with cameras using GPS technology in order to accurately depict the location of photos on the layer. These photos are shown in the ESRI map at the correct location and orientation so that County staff can easily see the features identified in the intersection reports and recommendation reports. Such an example is shown below in **Figure 6-1**.

**Figure 6-1 – Example of Photo Layer**

## **7. Analysis of Data**

# Analysis of Data

## Generic Prioritization of Types of Deficiencies

Of the information that was collected during field inspections, various scenarios of ADA deficiencies were identified. Working with LCDOT staff, these scenarios were identified and prioritized by their degree of severity as shown below in **Table 7-1**.

**Table 7-1 Prioritization of Types of Deficiencies**

| Priority Ranking | Type          | Scenario 1  | Scenario 2 | Value |
|------------------|---------------|---|------------|-------|
| 1                | Curb Ramp     | If curb ramp exists<br>but cross walk does not  |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and detectable warning surface is missing  |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and ramp grade is greater than 8.33%   |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and ramp width is <48"   |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and obstructions are located within the ramp   |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and gutter slopes are greater than 5%  |            | 3     |
| 1                | Curb Ramp     | If sidewalk exists<br>and curb ramp doesn't   |            | 3     |
| 1                | Crosswalk     | If crosswalk exists<br>and curb ramp doesn't  |            | 3     |
| 1                | Median        | If median refuge exists<br>and no detectable warnings exist   |            | 3     |
| 1                | Refuge Island | If refuge island exists<br>and detectable warnings do not exist   |            | 3     |
| 1                | Refuge Island | If refuge island exists<br>and ramp slopes within island are not 8.33% or less  |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and clear width to obstruction is <36"  |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and sidewalk grade away from intersection is >8.33%   |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and sidewalk landing at top of ramp is not present  |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and there is a change in level surface along sidewalk greater than 1/4"                                   |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and there is a drop off greater than 4" on the front or back of side                                      |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and there are overhead obstructions along sidewalk less than 84"  |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and there are missing sections or gaps along the sidewalk greater than 1/2"                               |            | 3     |
| 1                | Traffic Ops   | If pedestrian push button is present<br>and distance from sidewalk to push button is not equal to or less than 10"              |            | 3     |
| 1                | Traffic Ops   | If pedestrian push button is present<br>and the push button is not operable   |            | 3     |
| 1                | Traffic Ops   | If pedestrian push button is present<br>and the push button is not accessible   |            | 3     |
| 2                | Curb Ramp     | If curb ramp exists<br>and doesn't extend full width  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and ramp cross slope is greater than 2%  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and detectable warning surface is <24" deep  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and detectable warning surface is deficient  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and ramp falls outside of marked crosswalks  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and the width of the curb ramp is less than the width of the adjoining sidewalk                          |            | 2     |
| 2                | Driveways     | If driveway exists<br>and cross slope of sidewalk crossing driveway is <2%  |            | 2     |
| 2                | Crosswalk     | If crosswalk exists<br>and crosswalk width is less than 6'  |            | 2     |
| 2                | Crosswalk     | If crosswalk exists<br>and pavement marking condition is poor   |            | 2     |
| 2                | Median        | If median refuge exists<br>and refuge width is <36"   |            | 2     |
| 2                | Refuge Island | If refuge island exists<br>and pavement marking condition of minor crosswalk is poor  |            | 2     |
| 2                | Refuge Island | If refuge island exists<br>and width of crosswalk from island to corner is <6'  |            | 2     |
| 2                | Refuge Island | If refuge island exists<br>and ramp cross slopes in island are not 2% or less   |            | 2     |
| 2                | Sidewalk      | If sidewalk exists<br>and width of sidewalk is <48"   |            | 2     |
| 2                | Sidewalk      | If sidewalk exists<br>and cross slope is >2%  |            | 2     |
| 2                | Sidewalk      | If sidewalk exists<br>and sidewalk condition is cracked or shattered  |            | 2     |
| 2                | Traffic Ops   | If pedestrian push button is present<br>and push buttons aren't within 60" of the applicable crosswalk line                     |            | 2     |
| 2                | Traffic Ops   | If pedestrian push button is present<br>and push button is not located within range of 30"-120" from curb line                  |            | 2     |
| 2                | Traffic Ops   | If pedestrian push button is present<br>and there is not a level space at the push button                                       |            | 2     |
| 2                | Traffic Ops   | If pedestrian push button is present<br>and there is no push button sign present  |            | 2     |
| 3                | Curb Ramp     | If curb ramp exists<br>and detectable warning surface is not contrasting  |            | 1     |
| 3                | Curb Ramp     | If curb ramp flare slopes are present<br>and curb ramp flare slopes are greater than 8.33%                                      |            | 1     |
| 3                | Driveways     | If driveway exists<br>and driveway condition is cracked or shattered  |            | 1     |
| 3                | Crosswalk     | If crosswalk exists<br>and crosswalk cross slope is >2%   |            | 1     |
| 3                | Crosswalk     | If crosswalk exists<br>and 48" extension in crosswalk for diagonal crossing does not exist                                      |            | 1     |
| 3                | Sidewalk      | If no sidewalk exists<br>and there is obvious evidence of pedestrian use  |            | 1     |
| 3                | Traffic Ops   | If pedestrian push button is present<br>and push buttons are within 120" of other push buttons                                  |            | 1     |
| 3                | Traffic Ops   | If pedestrian push button is present<br>and push button is not parallel to the applicable direction of crossing                 |            | 1     |
| 3                | Traffic Ops   | If pedestrian push button is present<br>and the height from the sidewalk to the center of the push button is not within 42"-48" |            | 1     |

This document can also be found in Appendix C – Table 1. These scenarios were utilized to design search queries within a Microsoft Access database, titled “Tables Export.mdb” which is submitted in conjunction with this report. The queries that were used to design this database are listed in the document “Prioritization Scenarios with Queries by Issue” located in Appendix C – Table 2 and are also viewable within the Microsoft Access file. Each of these queries was assigned a value in Microsoft Access based on the one identified in Table 7-1.

## Deficiency Ratings

Following the input of field data into the geodatabase, Johnson Engineering then supplied an export of the database. These database files were opened in Microsoft Access and analyzed using the “Tables Export.mdb” to run the aforementioned queries.

The result of the compilation of all of the ADA deficiencies identified at each respective intersection is called the “Deficiency Rating”. This is a rating of non ADA compliance; the higher the “Deficiency Rating”, the higher the degree of need for improvements. Such tabulation of inventory data is intended to assist the County in prioritization of improvements. This final table is referred to as the “Index” and facilitated with compilation of the final recommendation reports. The final indexes can be found in Appendix C - Tables 3 through 6.

## Recommendation Reports

The recommendation reports are a detailed explanation of the findings represented in the index. The recommendation reports have summarized the improvements needed and defined the design standards that should be used for the improvements.

Submittals were phased based off of priority groupings (Priority 1-5, Priority 6-10, Priority 11-15, and Priority 16-20). Each submittal included:

- One hard copy compilation of the recommendation report, inspection table report, photos, and sketch for each intersection in order of the index deficiency ranking (high to low).
- CD containing:
  - PDFs of photos for each intersection
  - PDFs of reports (inspection tables) for each intersection
  - PDFs of recommendations for each intersection
  - Index applicable to grouping
  - Index Instructions (also found in Appendix C- Figure 1 of this document)

## **8. The Next Steps**

# The Next Steps

## The Next Steps

The following items are subsequent tasks that should be considered while finalizing the County Wide ADA Transition Plan:

- Preparation of a plan schedule for implementing the improvements that have been recommended.
- Identifying potential funding opportunities for implementing recommendations.
- Developing an information page for the County's website where the public can seek out information about the Plan.
- Developing a web based procedure for citizens to file comments and inquiries regarding County pedestrian facilities.
- Continued utilization of the submitted GIS Database and Microsoft Access Database to expand project area when/if needed by County staff

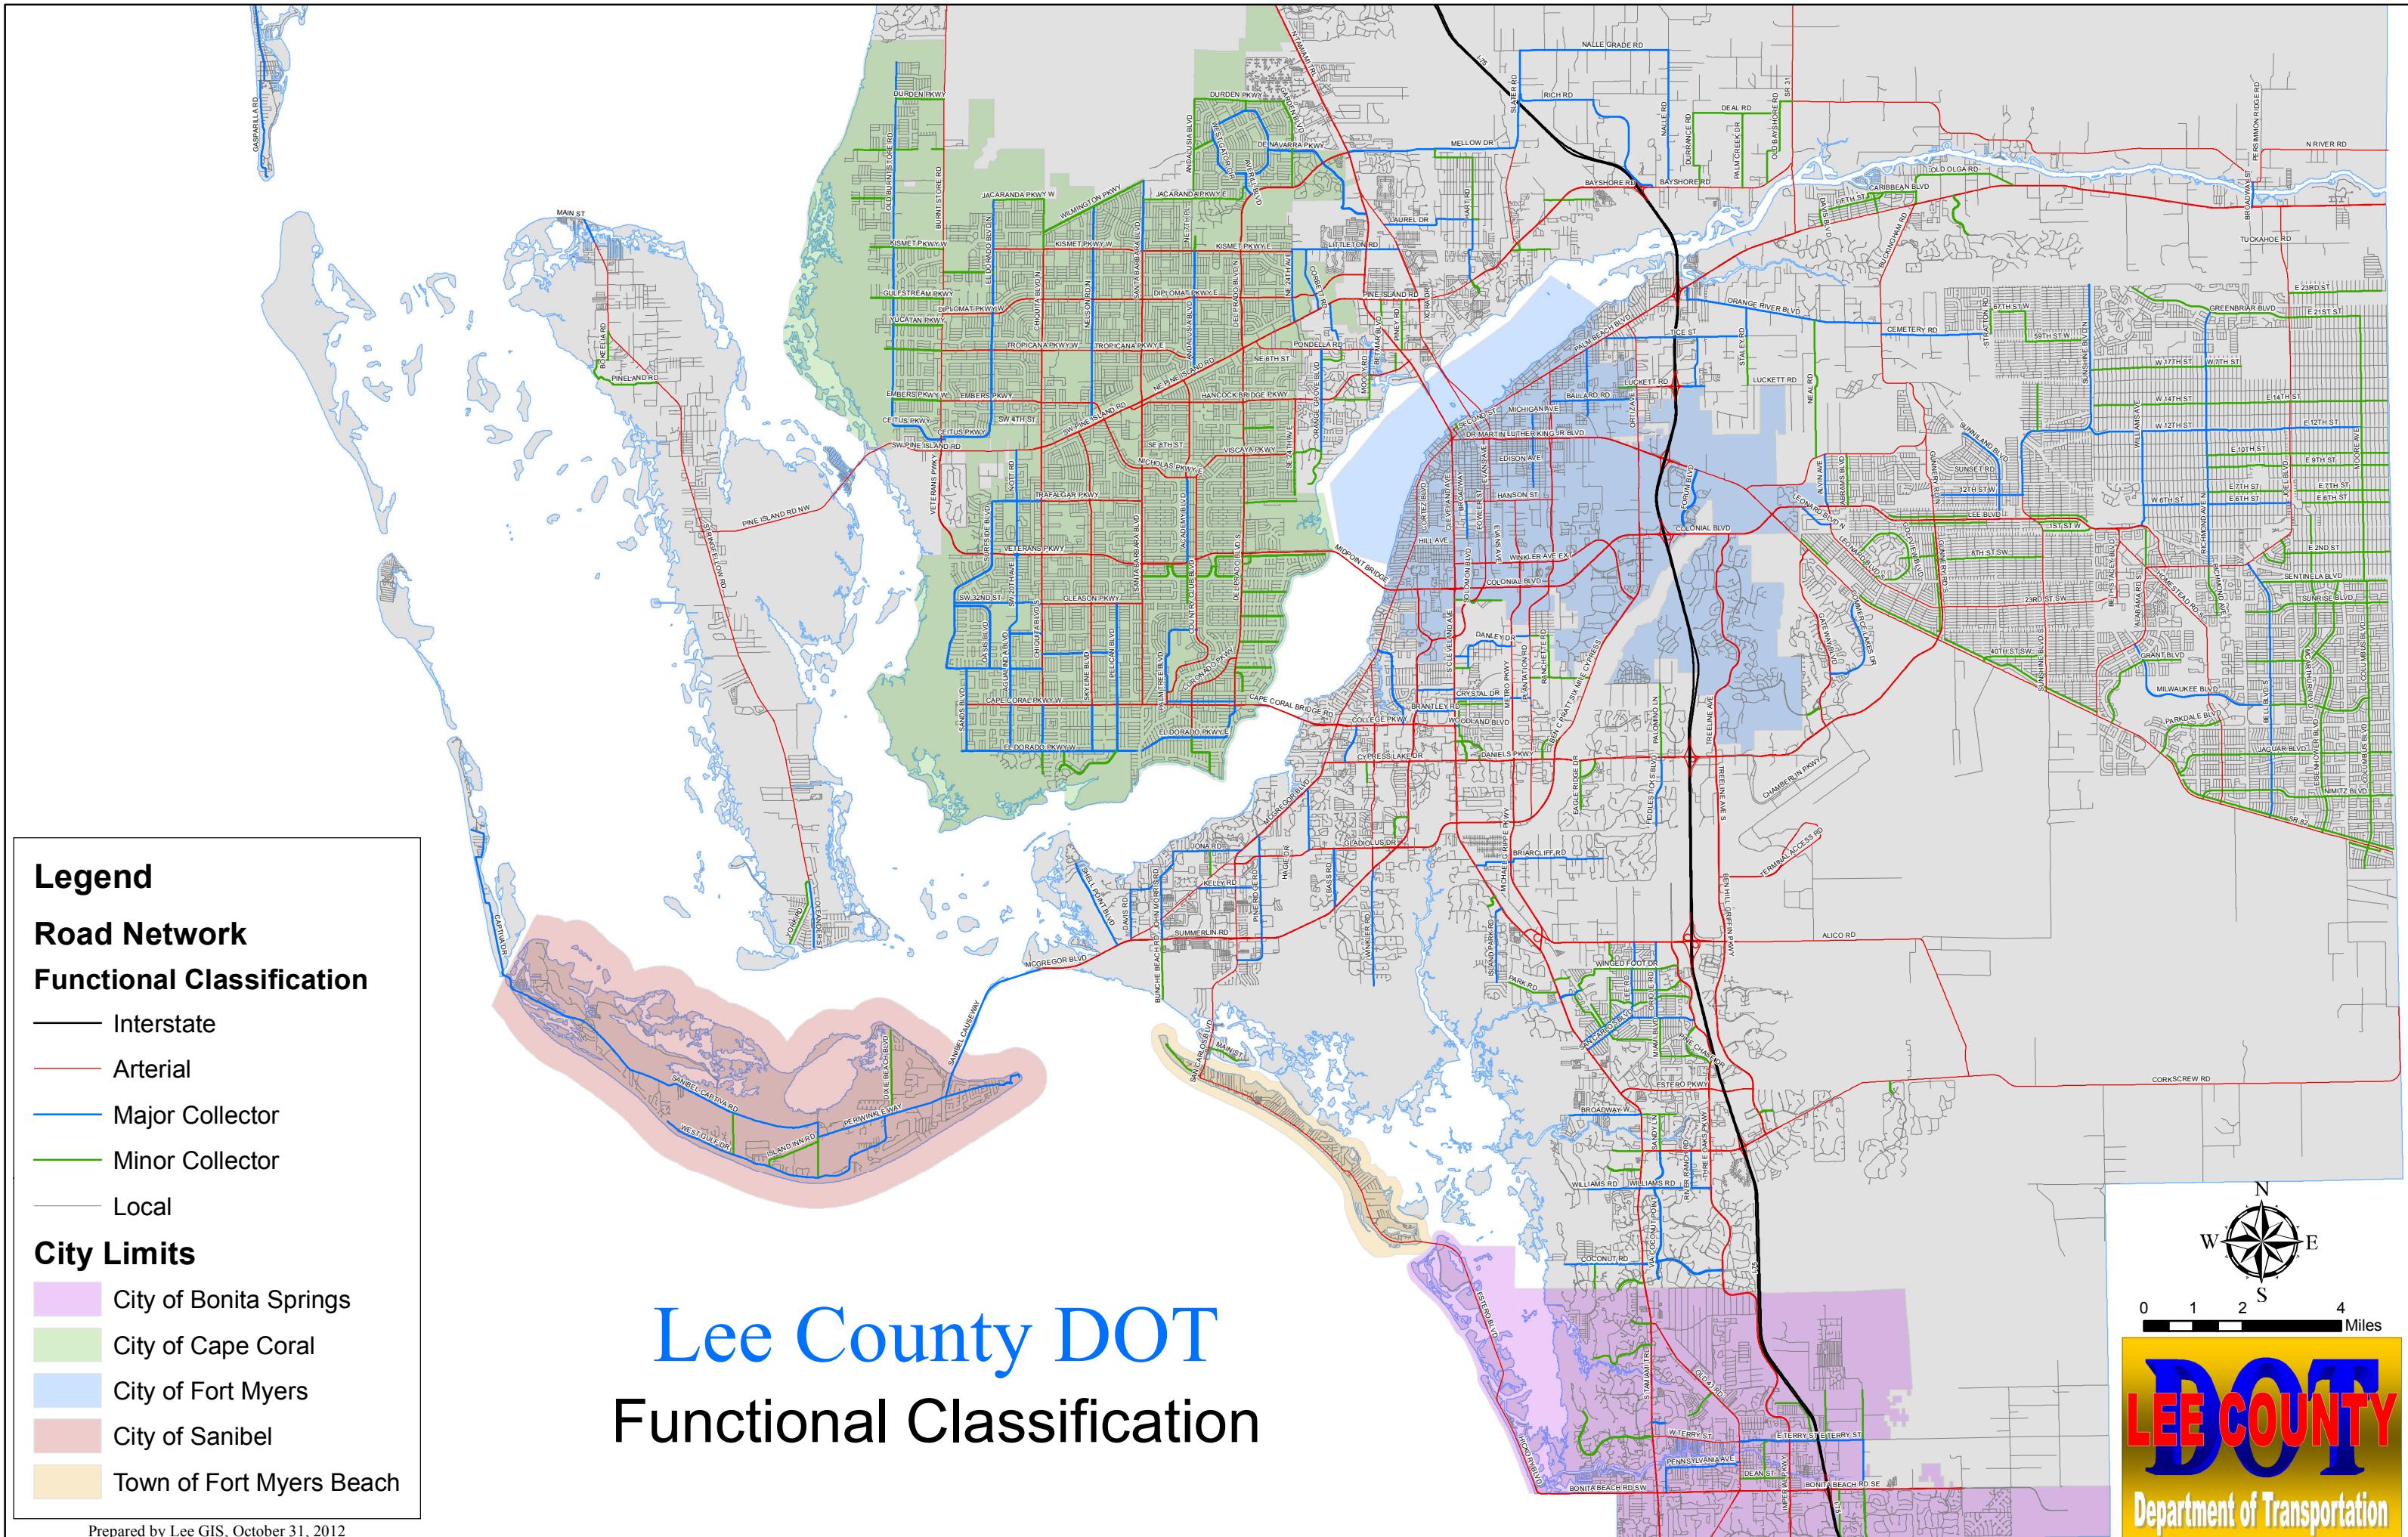

Note - the following intersection locations in **Table 8-1** were removed from the Project Area after it had been established due to lack of pedestrian facilities and/or lack of budget for additional field inspections.

**Table 8-1 Intersections Removed from Project Area Post Development**

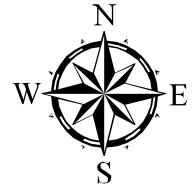

| <b>ID</b> | <b>Roadway</b>         | <b>Intersecting Roadway</b> | <b>Priority Ranking</b> |
|-----------|------------------------|-----------------------------|-------------------------|
| 3115      | Crystal Drive          | Beacon Street               | 6                       |
| 10006     | Crystal Drive          | Plantation Road             | 6                       |
| 10031     | Luckett Road           | Country Lakes Dive          | 9                       |
| 2201      | Del Prado Boulevard    | Hancock Bridge Parkway      | 10                      |

Lee County CIP Projects from www.leegov.com as of April 30th, 2013

| Proj. No. | Projects                                     | Status  | Manager                         |
|-----------|--|---|---------------------------------|
| 204083    | A&W Bulb Road Widening                       | Construction underway.  | <a href="#">Rob Phelan</a>      |
| 205075    | Alico Rd 4L - Ben Hill/Airport Rd            | Preliminary design underway. Construction in 2015/16 funded.                                  | <a href="#">Sarah Clarke</a>    |
| 206002    | Bicycle/Pedestrian Facilities                | Daniels Pike/Ped gap fill in design   | <a href="#">Mike Tisch</a>      |
| 205720    | Bonita Beach Road - Phase II                 | Construction underway.  | <a href="#">Sarah Clarke</a>    |
| 205723    | Bonita Beach Road - Phase III                | Design complete, construction right of way not funded   | <a href="#">Sarah Clarke</a>    |
| 206758    | Briarcliff/Ripp Signalization                | Signal must meet warrants after Metro Extension is open                                       | <a href="#">Steve Jansen</a>    |
| 204088    | Burnt Store Road Four Laning-78 to Van Buren | Burnt Store Road Four Laning-78 to Van Buren  | <a href="#">Sarah Clarke</a>    |
| 205601    | Cape/Midpoint Plaza Reconstruction           | Construction underway at Cape. Midpoint complete.   | <a href="#">John Solich</a>     |
| 205053    | Captiva Drive Shoulders                      | Ongoing vegetation maintenance.   | <a href="#">Betsie Hiatt</a>    |
| 205065    | Corkscrew Road Curve                         | Ongoing vegetation maintenance.   | <a href="#">Betsie Hiatt</a>    |
| 206688    | Del Prado Signals/Resurfacing                | Construction underway.  | <a href="#">Steve Jansen</a>    |
| 205038    | E-ARCS Upgrade for Leeway                    | Completing customer web access.   | <a href="#">Rob Radford</a>     |
| 205067    | Esterro Blvd Improvements                    | Preliminary construction underway   | <a href="#">Rob Phelan</a>      |
| 205021    | Estero Parkway Extension                     | Landscaping phase to begin 2/2012 then enter maintenance phase.                               | <a href="#">Bob Debrock</a>     |
| 205063    | Homestead 4L / Sunrise-Alabama               | ROW acquisition underway. Construction in 2015/16   | <a href="#">Sarah Clarke</a>    |
| 205036    | I-75 Complimentary ITS Development           | Fiber for Daniels in conjunction with widening underway.                                      | <a href="#">Awaldo Gonzalez</a> |
| 205068    | Luckett Road 4L / Ortiz to I-75              | Finalizing ROW acquisition. Construction not funded in 5 Year CIP.                            | <a href="#">Rob Phelan</a>      |
| 205904    | Matlacha Pass Bridge Replacement             | Construction underway.  | <a href="#">Sarah Clarke</a>    |
| 205074    | Mitigation Bank                              | Ongoing permit discussions with Army Corps.   | <a href="#">Betsie Hiatt</a>    |
| 204100    | North Airport Road Extension West            | Design underway by developer.   | <a href="#">Sarah Clarke</a>    |
| 205056    | Ortiz Avenue/SR 80 - Luckett Road            | ROW acquisition underway. Construction not funded in 5 Year CIP.                              | <a href="#">Rob Phelan</a>      |
| 204072    | Ortiz Four Laning - MLK to Luckett           | ROW acquisition underway. Construction not funded in 5 Year CIP.                              | <a href="#">Rob Phelan</a>      |
| 204065    | Plantation Ext., Idlewild to Colonial        | Landscaping phase, in maintenance phase.  | <a href="#">Bob Debrock</a>     |
| 206759    | Signal System ATMS Upgrades                  | Fiber to ATMS on Daniels, Cypress Lake and Colonial.  | <a href="#">Awaldo Gonzalez</a> |
| 204604    | Six Mile Cypress Pkwy 4 Laning               | Construction underway.  | <a href="#">Rob Phelan</a>      |
| 206691    | Summerlin Bike-Ped Accommodation             | Construction to begin Oct. 2012.  | <a href="#">Sarah Clarke</a>    |
| 204053    | Three Oaks Pkwy Extension, North             | Design completed, partial ROW acquisition underway.<br>Construction not funded in 5 Year CIP. | <a href="#">Sarah Clarke</a>    |
| 204081    | Three Oaks Pkwy Widening                     | Landscaping phase, 15% complete.  | <a href="#">Sarah Clarke</a>    |
| 204683    | C-1 Lehigh Resurfacing 2012                  | Underway.   | <a href="#">Dirk Danley</a>     |
| 204683    | C-1 County Wide Local Rd. Resurfacing 2012   | Notice to proceed June 2012.  | <a href="#">Dirk Danley</a>     |
| 204683    | Bike Path Resurfacing                        | Notice to proceed June 2012.  | <a href="#">Dirk Danley</a>     |

Intersection Survey Priority Map

## **Appendix B. Evaluation Criteria**

## B.1. **Figure 1: ADA Transition Plan Inspection Process**

## Lee County ADA Transition Plan Inspection Process

### Photo Instructions:

1. Using a GPS camera, hit the button on the left side of the camera. Ensure that within “GPS options” that “Record GPS data” is turned ON. Before capturing any images, the below icon must be present on the screen for an accurate location.

2. Capture photographs of:
  - Each curb ramp inspected from a view within the crosswalk/street.
  - Any physical obstacles identified during inspection.
  - Applicable ADA amenities at each location.
  - At sites where there is no existing pedestrian pathway, document whether or not there is any obvious evidence of pedestrian use.
3. Refer to “Deliverable to Johnson Engineering” portion of this document for the procedure of uploading, renaming, and sending photographs.

### Numbers File Instructions:

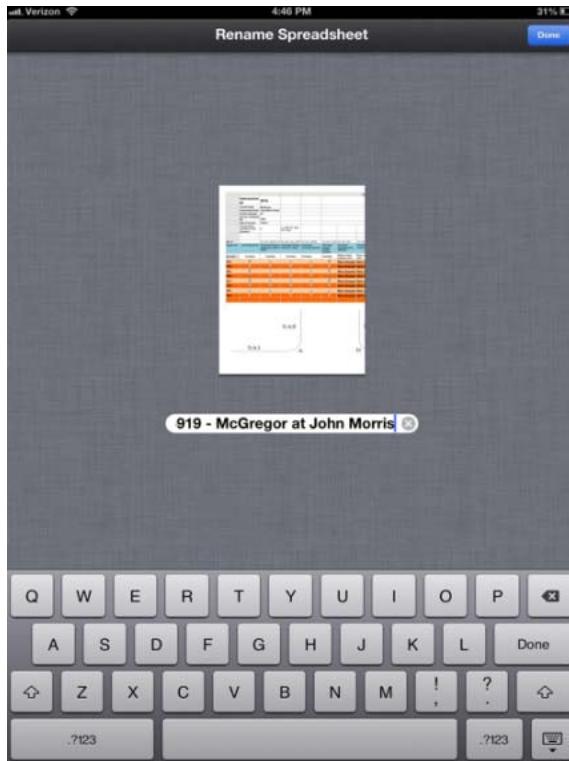

1. Open the numbers application. Hold down the “MASTER TEMPLATE” spreadsheet with your finger until all of the graphics start to wiggle. Then hit the “+” button in the top left. This will create a copy of the master, “MASTER TEMPLATE copy”.

2. Hold your finger down on the text below the icon of the spreadsheet, and the “Rename Spreadsheet” dialog will appear. Rename the spreadsheet using the format “Intersection ID –

## Lee County ADA Transition Plan Inspection Process

Roadway & Intersecting Roadway". You can reference either the ESRI map or the hard copy of the "Intersections Progress by Priority".

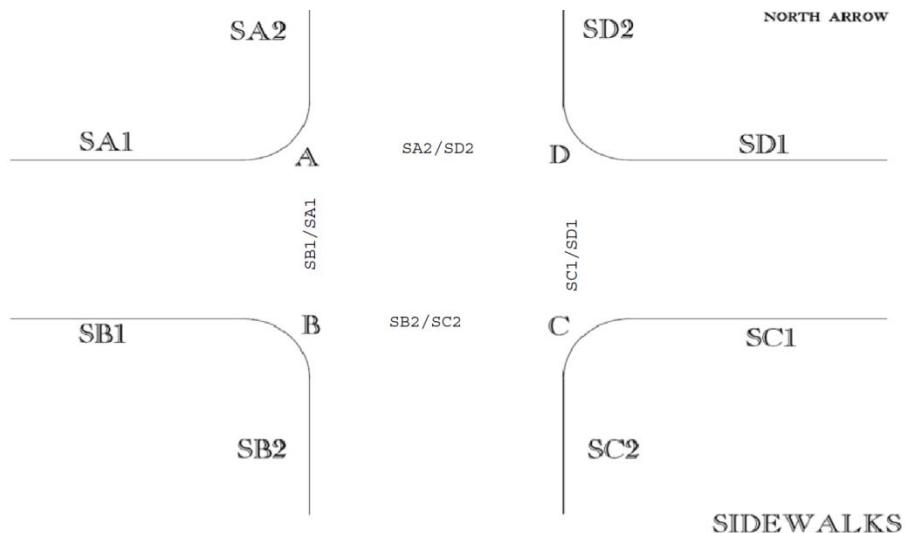

3. Within applicable tabs/features there is a column "Exists" (T/F) that may be helpful to fill out prior to beginning inspections so that you can track whether the absence of data entry in a row is due to the absence of a feature or due to the fact that the segment has not been inspected yet. Please note that if a field is checked it means TRUE, and if left unchecked it means FALSE.
4. CURB RAMP TAB NOTES
  - If one curb ramp services both sidewalk legs at the corner of an intersection, on the curb ramp tab you will still need to check "exists" for both legs and repeat the data as it applies to the same curb ramp for each leg. The only data that may be different in this scenario is the curb ramp flare as it applies to either side of the ramp. Failing to repeat the information on both applicable segments could potentially flag a segment of the intersection as deficient for lack of curb ramp when in reality it is not.

## Lee County ADA Transition Plan Inspection Process

### 5. DRIVEWAYS,CROSS... TAB NOTES

- The segment ID applicable to the crosswalk should correspond with the leg of the closest corner (not necessarily the leg where sidewalk is identified) as depicted in the template sketch below. For example, if there is only sidewalk on leg SC1 and a curb ramp with a crosswalk crossing from C to B, then:
  - SC1 sidewalk exists
  - SC2 curb ramp exists
  - SC2/SB2 crosswalk exists

### 6. SIDEWALK TAB NOTES

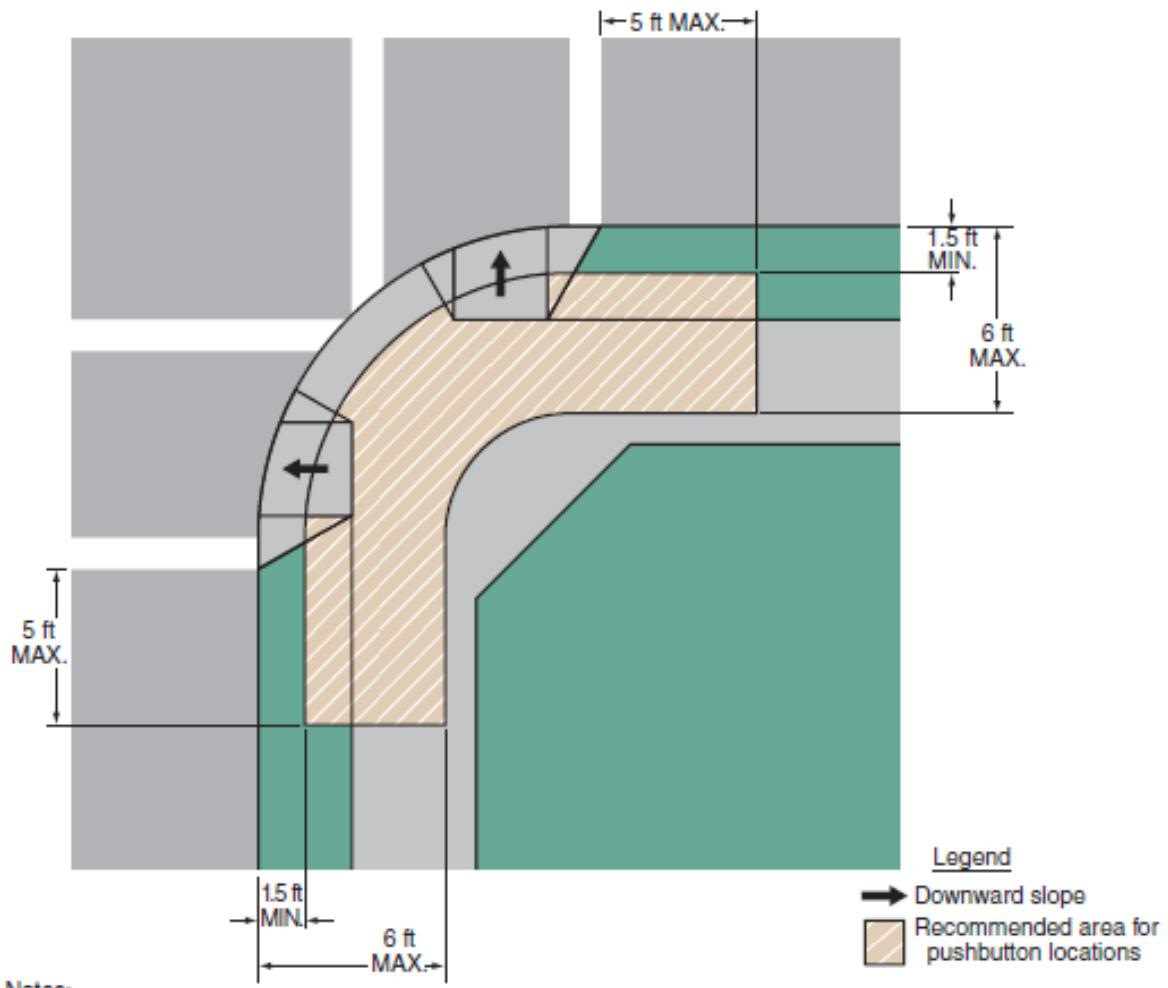

- If sidewalk exists at a corner but no curb ramps or connectivity (crosswalk) exists to service that corner, still inspect the sidewalks but leave the curb ramp and crosswalk tabs as false for “exists”. This will help in the future flag the corner as a deficiency for its lack of connectivity.

### 7. PEDESTRIAN REFUGE ISLANDS

- If a pedestrian refuge island exists, treat the intersection as if the island does not exist (IE if there is a pedestrian island within the crosswalk of SB2/SC2, still gather the information for the curb ramps and crosswalk on corner C for rows SC1 and SC2 where applicable). The information gathered specific to the pedestrian refuge island, including the crosswalk as it enters and leaves the islands, will be recorded in the columns following “Refuge Island Exists?”

### 8. TRAFFIC OPS TAB NOTES

- Figure 4E-3 (below) shows typical areas for push button location. It can be used to help determine if a push button is located within 60" of a crosswalk line, or if a push button is within 30" to 120" from a curb line.

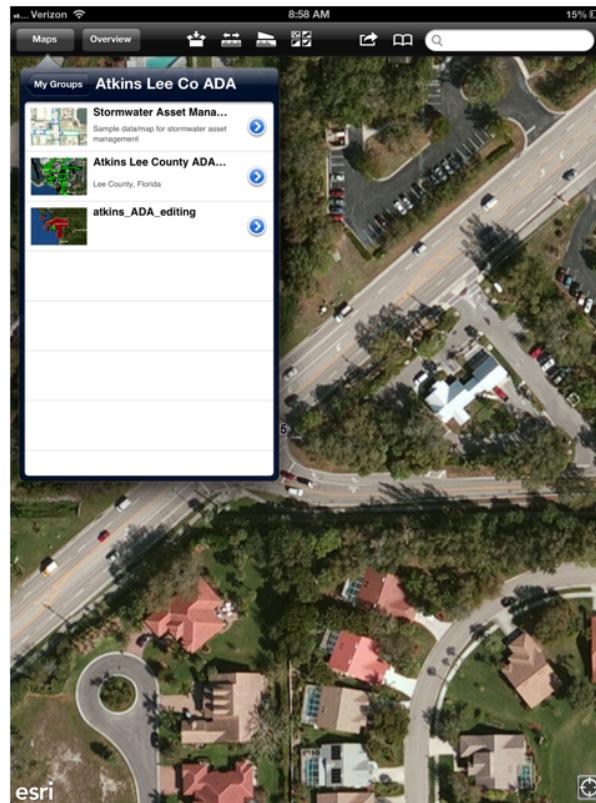

**Figure 4E-3. Pushbutton Location Area****Notes:**

1. Where there are constraints that make it impractical to place the pedestrian pushbutton between 1.5 feet and 6 feet from the edge of the curb, shoulder, or pavement, it should not be further than 10 feet from the edge of curb, shoulder, or pavement.
2. Two pedestrian pushbuttons on a corner should be separated by 10 feet.
3. This figure is not drawn to scale.
4. Figure 4E-4 shows typical pushbutton locations.

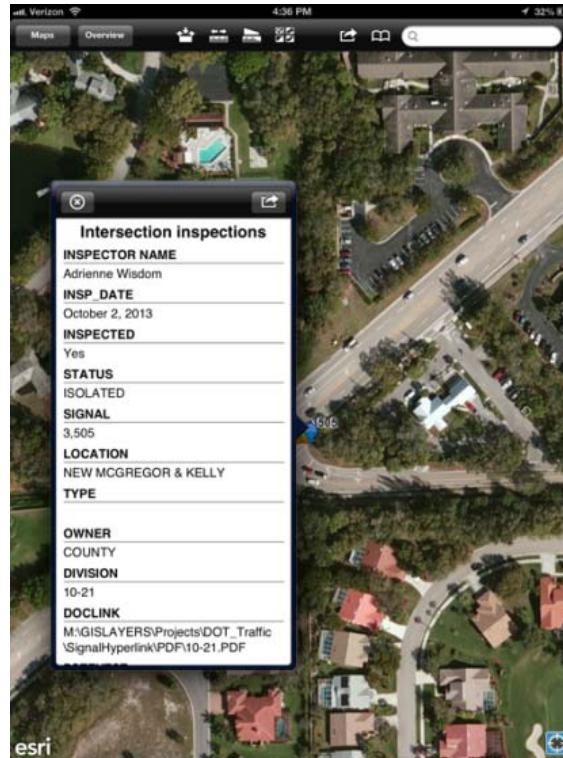

[ArcGIS Online ESRI Instructions:](#)

9. Open the ArcGIS ESRI icon on the iPad and click “Maps” in the top left corner. Sign in.
10. Select “My Groups.”
11. Select “Atkins Lee Co ADA.”
12. Select “atkins\_ADA\_editing.”

## Lee County ADA Transition Plan Inspection Process

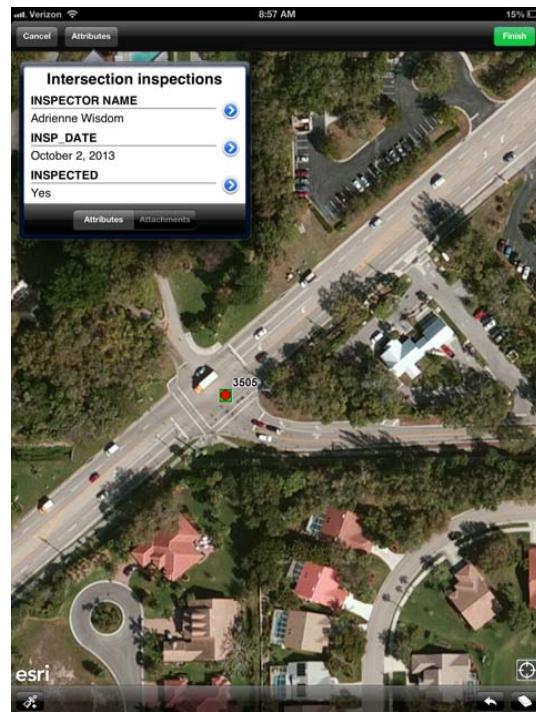

13. In ESRI application, select by tapping the red symbol at the intersection you are inspecting.

## Lee County ADA Transition Plan Inspection Process

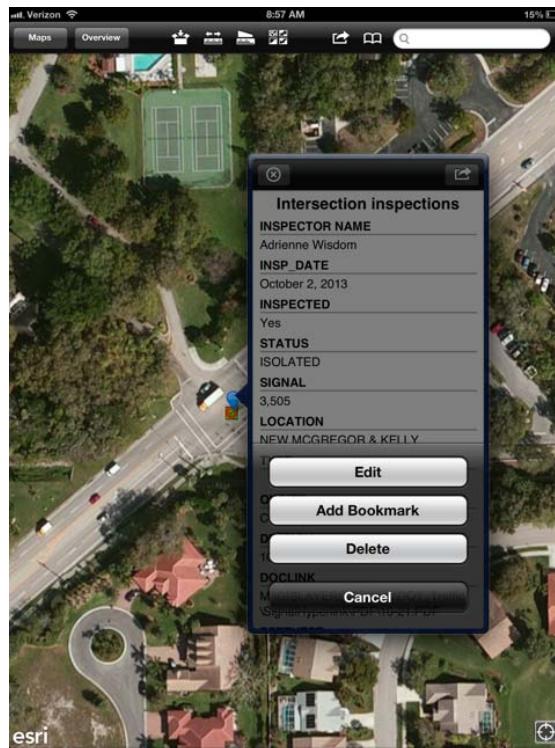

14. In the top right of the dialog box, click the arrow. Select “Edit”.

- Enter name, date, and change “Inspected” to “Yes”. The red symbol should change to a green check.

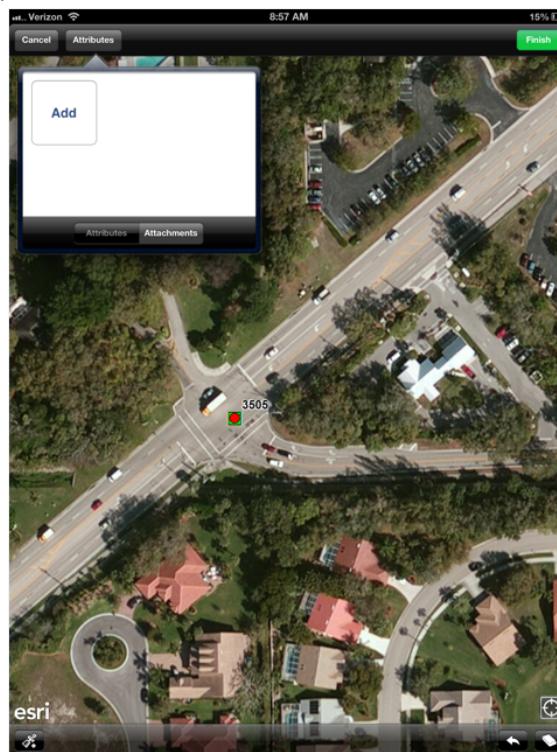

15. One photo should be taken from the iPad from an angle that encompasses the intersection.

This can be done while in the “Edit” box. Select “Attachments” while in the “Attributes” dialog box.

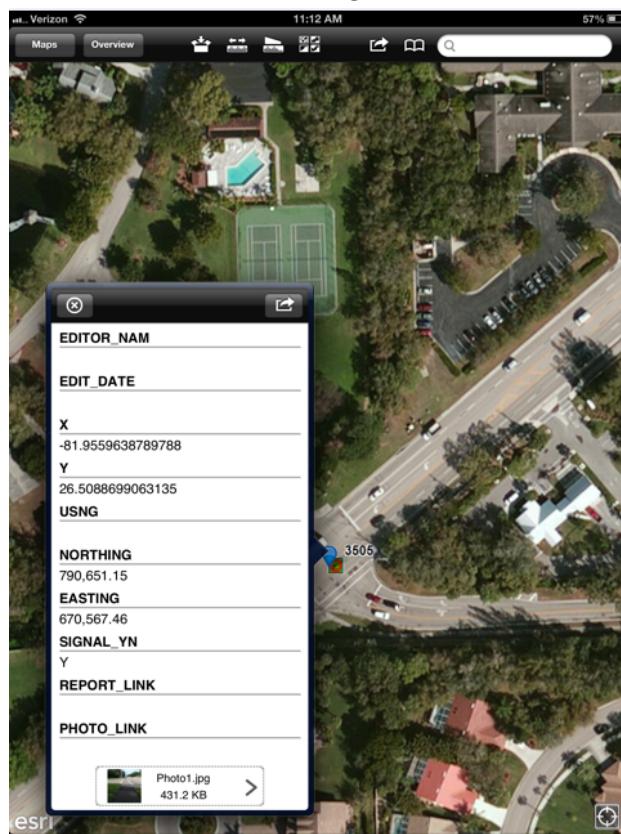

## Lee County ADA Transition Plan Inspection Process

16. Select “Add”, and “Take photo or video”.

17. The photo will appear at the bottom of the dialog box under “Photo Link”.

## Lee County ADA Transition Plan Inspection Process

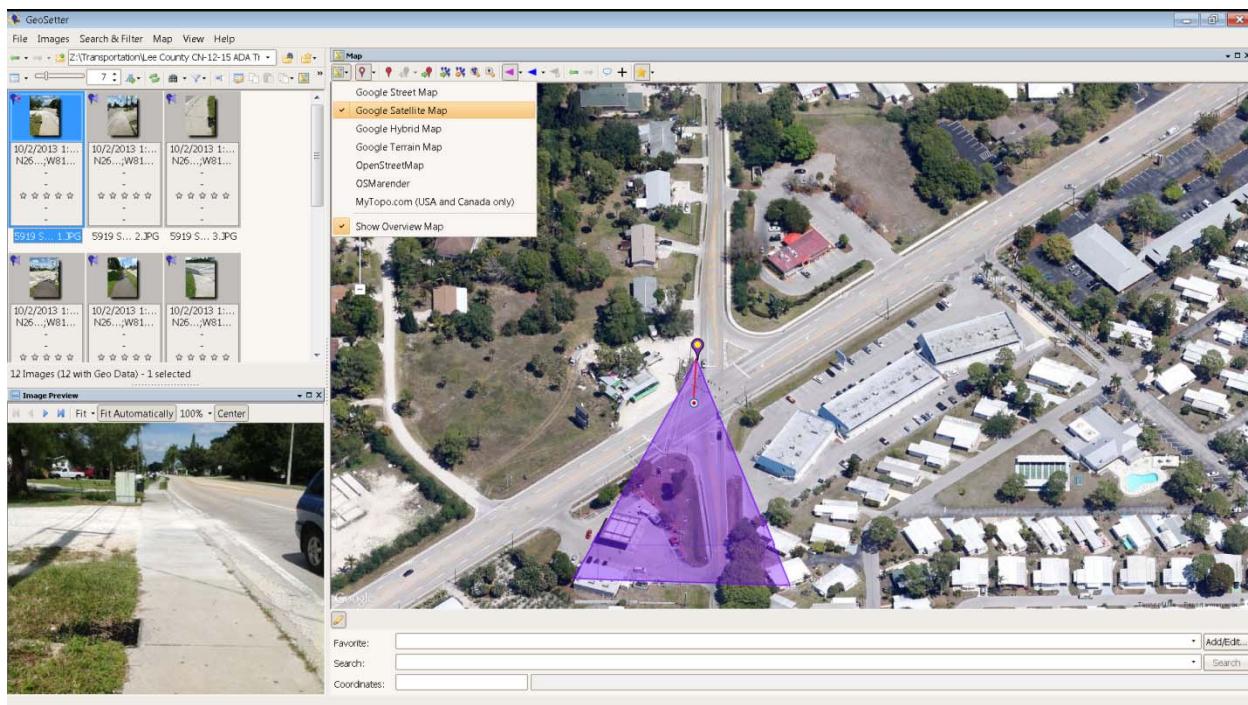

### Deliverable to Johnson Engineering:

- Prior to uploading inspection material, create a copy of the “master” folder at this location:

Z:\Transportation\Lee County CN-12-15 ADA Transition Plan\Inspections

and rename it using the format “Intersection ID – Roadway & Intersecting Roadway”. For example: “3505 - McGregor Boulevard & Kelly Road”. This folder will have three subfolders:

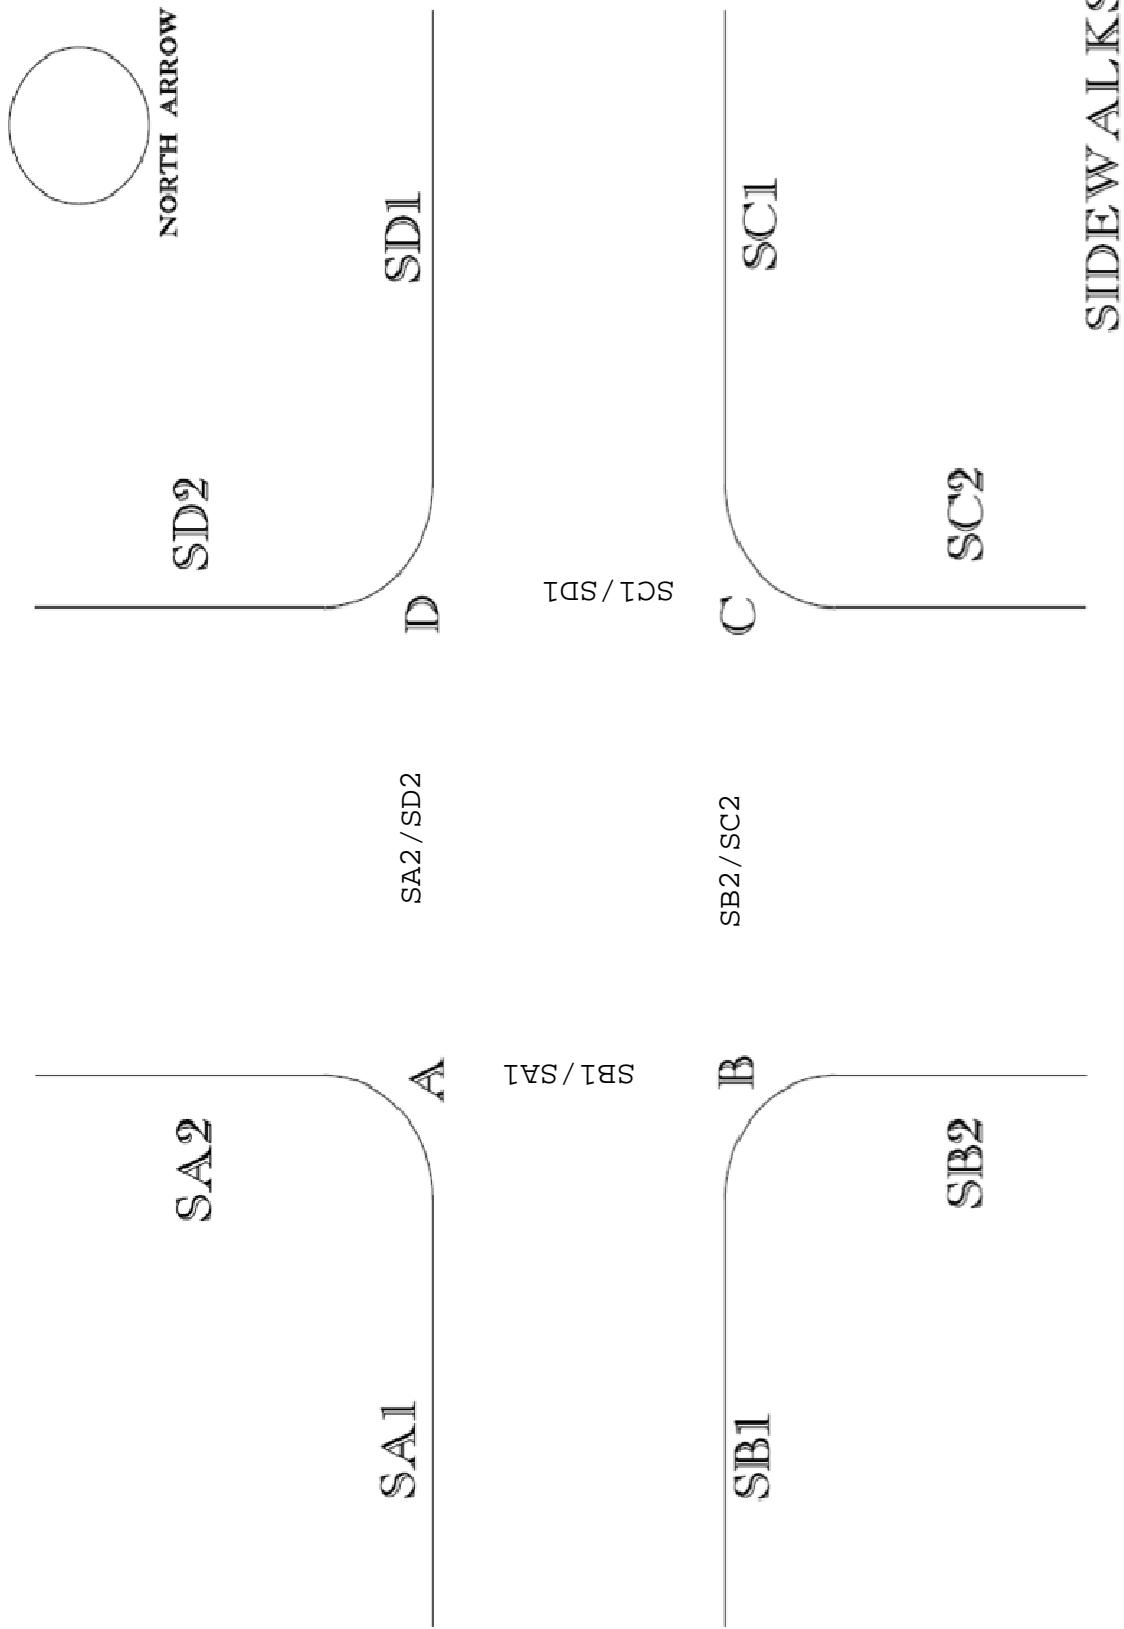

- Photos
  - Report
  - Sketch
- In addition to the photo uploaded via the iPad to represent the intersection, photos should be taken with the GIS camera and uploaded to the intersection specific folder on the server in the “Photos” subfolder.
    - Each photo should be renamed based off of the intersection ID, then segment ID of where the photo was taken, followed by the sequential number (based on how many photos were taken on that leg of the intersection). For example:
      - 5919\_SA2-1
      - 5919\_SA2-2
  - Use GeoSetter to adjust these photos to the correct location and orientation.
    - Download GeoSetter to your desktop from <http://www.geosetter.de/en/>. At the website, click on the “Downloads” tab and then click on geosetter\_setup.exe. Run this file and save the program to your desktop.
    - Double click the GeoSetter icon on your desktop to open the program. At the top of the screen below the area titled “Map” change the map setting to “Google Satellite Map”.

## Lee County ADA Transition Plan Inspection Process

3. On the top left where the folder symbol is path out to the folder where you have saved the photos for the given intersection. You should see thumbnails of the photos within the selected folder appear in the top left quadrant and a purple pin and arrow appear on the map.
4. Drag and drop the pin of the selected photo (a preview of selected photo will appear in the bottom left quadrant) to the correct location. When the “Changed Position” dialog box appears, select “Move Image”.
5. Next, drag the red dot at the end of the red line (within the large purple triangle) to the correct location to rotate the triangle. The purple triangle represents the vantage point of the photographer. The area shaded in purple represents the area seen in the photograph.
6. Once your photo is positioned correctly, go to the “Images” menu in the top left and scroll down and select “Save Images”. You should now see a new file within the folder where your photographs were saved with \_original at the end of it. The “\_original” files are the original photos from the camera. The .JPG files are the files that have the updated position embedded in their photos properties.
7. The updated photo should then be saved into a .zip folder to compress for emailing, saved as “ID Photos.zip”. For example, “3505 Photos.zip”.
4. Scan the sketch of the intersection that was done in the field and rename it “Intersection ID - Sketch” and save it in the “Sketch” subfolder for the intersection.
5. On the iPad, go to the numbers app and to the main page where you can see all of the documents as thumbnails. Hit the box with the arrow up in it (top left corner of screen next to the “+” sign. Select “Send a Copy”, select the numbers file you would like to send. Select “Mail” and then choose “Numbers” when it asks you for the format. Email it to yourself and save it in the “Report” subfolder for the intersection.

## Appendix C. Analysis of Data

**C.1. Table 1: Prioritization of Types of ADA Deficiencies**

**Prioritization of Types of ADA Deficiencies**

**ATKINS**

| Priority Ranking | Type          | Scenario 1  | Scenario 2 | Value |
|------------------|---------------|---|------------|-------|
| 1                | Curb Ramp     | If curb ramp exists<br>but cross walk does not  |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and detectable warning surface is missing  |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and ramp grade is greater than 8.33%   |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and ramp width is <48"   |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and obstructions are located within the ramp   |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and gutter slopes are greater than 5%  |            | 3     |
| 1                | Curb Ramp     | If sidewalk exists<br>and curb ramp doesn't   |            | 3     |
| 1                | Crosswalk     | If crosswalk exists<br>and curb ramp doesn't  |            | 3     |
| 1                | Median        | If median refuge exists<br>and no detectable warnings exist   |            | 3     |
| 1                | Refuge Island | If refuge island exists<br>and detectable warnings do not exist   |            | 3     |
| 1                | Refuge Island | If refuge island exists<br>and ramp slopes within island are not 8.33% or less  |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and clear width to obstruction is <36"  |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and sidewalk grade away from intersection is >8.33%   |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and sidewalk landing at top of ramp is not present  |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and there is a change in level surface along sidewalk greater than 1/4"                                   |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and there is a drop off greater than 4" on the front or back of side                                      |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and there are overhead obstructions along sidewalk less than 84"  |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and there are missing sections or gaps along the sidewalk greater than 1/2"                               |            | 3     |
| 1                | Traffic Ops   | If pedestrian push button is present<br>and distance from sidewalk to push button is not equal to or less than 10"              |            | 3     |
| 1                | Traffic Ops   | If pedestrian push button is present<br>and the push button is not operable   |            | 3     |
| 1                | Traffic Ops   | If pedestrian push button is present<br>and the push button is not accessible   |            | 3     |
| 2                | Curb Ramp     | If curb ramp exists<br>and doesn't extend full width  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and ramp cross slope is greater than 2%  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and detectable warning surface is <24" deep  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and detectable warning surface is deficient  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and ramp falls outside of marked crosswalks  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and the width of the curb ramp is less than the width of the adjoining sidewalk                          |            | 2     |
| 2                | Driveways     | If driveway exists<br>and cross slope of sidewalk crossing driveway is <2%  |            | 2     |
| 2                | Crosswalk     | If crosswalk exists<br>and crosswalk width is less than 6'  |            | 2     |
| 2                | Crosswalk     | If crosswalk exists<br>and pavement marking condition is poor   |            | 2     |
| 2                | Median        | If median refuge exists<br>and refuge width is <36"   |            | 2     |
| 2                | Refuge Island | If refuge island exists<br>and pavement marking condition of minor crosswalk is poor  |            | 2     |
| 2                | Refuge Island | If refuge island exists<br>and width of crosswalk from island to corner is <6'  |            | 2     |
| 2                | Refuge Island | If refuge island exists<br>and ramp cross slopes in island are not 2% or less   |            | 2     |
| 2                | Sidewalk      | If sidewalk exists<br>and width of sidewalk is <48"   |            | 2     |
| 2                | Sidewalk      | If sidewalk exists<br>and cross slope is >2%  |            | 2     |
| 2                | Sidewalk      | If sidewalk exists<br>and sidewalk condition is cracked or shattered  |            | 2     |
| 2                | Traffic Ops   | If pedestrian push button is present<br>and push buttons aren't within 60" of the applicable crosswalk line                     |            | 2     |
| 2                | Traffic Ops   | If pedestrian push button is present<br>and push button is not located within range of 30"-120" from curb line                  |            | 2     |
| 2                | Traffic Ops   | If pedestrian push button is present<br>and there is not a level space at the push button                                       |            | 2     |
| 2                | Traffic Ops   | If pedestrian push button is present<br>and there is no push button sign present  |            | 2     |
| 3                | Curb Ramp     | If curb ramp exists<br>and detectable warning surface is not contrasting  |            | 1     |
| 3                | Curb Ramp     | If curb ramp flare slopes are present<br>and curb ramp flare slopes are greater than 8.33%                                      |            | 1     |
| 3                | Driveways     | If driveway exists<br>and driveway condition is cracked or shattered  |            | 1     |
| 3                | Crosswalk     | If crosswalk exists<br>and crosswalk cross slope is >2%   |            | 1     |
| 3                | Crosswalk     | If crosswalk exists<br>and 48" extension in crosswalk for diagonal crossing does not exist                                      |            | 1     |
| 3                | Sidewalk      | If no sidewalk exists<br>and there is obvious evidence of pedestrian use  |            | 1     |
| 3                | Traffic Ops   | If pedestrian push button is present<br>and push buttons are within 120" of other push buttons                                  |            | 1     |
| 3                | Traffic Ops   | If pedestrian push button is present<br>and push button is not parallel to the applicable direction of crossing                 |            | 1     |
| 3                | Traffic Ops   | If pedestrian push button is present<br>and the height from the sidewalk to the center of the push button is not within 42"-48" |            | 1     |

**C.2. Table 2: Prioritization Scenarios with Queries by Issue**

**Types of ADA Deficiencies**

**ATKINS**

| Type          | Access Query         | Scenario 1                            | Column Heading in Numbers File      | Scenario 2  | Column Heading in Numbers File                                     |
|---------------|----------------------|---------------------------------------|-------------------------------------|---|--|
| Curb Ramp     | CR_Issue01           | If curb ramp exists                   | CURB RAMP EXISTS (TRUE/CHECKED)     | but cross walk does not   | CROSSWALK EXISTS (FALSE/UNCHECKED)                                 |
| Curb Ramp     | CR_Issue02           | If curb ramp exists                   | CURB RAMP EXISTS (TRUE/CHECKED)     | and doesn't extend full width   | CR_DET_WARN (FALSE/UNCHECKED)                                      |
| Curb Ramp     | CR_Issue03           | If curb ramp exists                   | CURB RAMP EXISTS (TRUE/CHECKED)     | and detectable warning surface is <24" deep   | CR_DET_24in_DEEP (FALSE/UNCHECKED)                                 |
| Curb Ramp     | CR_Issue04           | If curb ramp exists                   | CURB RAMP EXISTS (TRUE/CHECKED)     | and detectable warning surface is missing   | CR_DET_SURF (TRUE/CHECKED)   |
| Curb Ramp     | CR_Issue05           | If curb ramp exists                   | CURB RAMP EXISTS (TRUE/CHECKED)     | and detectable warning surface is deficient   | CR_DET_WARN (TRUE/CHECKED)   |
| Curb Ramp     | CR_Issue06           | If curb ramp exists                   | CURB RAMP EXISTS (TRUE/CHECKED)     | and detectable warning surface is not contrasting                                       | if CR_DET_CLR (BLACK) and SW_MAT (ASHPHALT) or if discovered in QC |
| Curb Ramp     | CR_Issue07           | If curb ramp exists                   | CURB RAMP EXISTS (TRUE/CHECKED)     | and ramp cross slope is greater than 2%   | CR_CRO_SLO_PER (>2.0%)   |
| Curb Ramp     | CR_Issue08           | If curb ramp exists                   | CURB RAMP EXISTS (TRUE/CHECKED)     | and ramp falls outside of marked crosswalks   | CR_RAMP_CWK (TRUE/CHECKED)   |
| Curb Ramp     | CR_Issue09           | If curb ramp exists                   | CURB RAMP EXISTS (TRUE/CHECKED)     | and ramp grade is greater than 8.33%  | CR_RAMP_GR (>8.33%)  |
| Curb Ramp     | CR_Issue10           | If curb ramp exists                   | CURB RAMP EXISTS (TRUE/CHECKED)     | and ramp width is <48"  | CR_RAMP_WID (<48")   |
| Curb Ramp     | CR_Issue11           | If curb ramp exists                   | CURB RAMP EXISTS (TRUE/CHECKED)     | and obstructions are located within the ramp  | CR_OBS (TRUE/CHECKED)  |
| Curb Ramp     | CR_Issue12           | If curb ramp exists                   | CURB RAMP EXISTS (TRUE/CHECKED)     | and gutter slopes are greater than 5%   | CR_GTR_SLP (FALSE/NOT CHECKED)                                     |
| Curb Ramp     | CR_Issue13           | If curb ramp flare slopes are present | CR_FLR_SLO (TRUE/CHECKED)           | and curb ramp flare slopes are greater than 8.33%                                       | CR_FLR_SLO_PER (>8.33%)  |
| Curb Ramp     | CR_Issue14           | If sidewalk exists                    | SIDEWALK EXISTS (TRUE/CHECKED)      | and curb ramp doesn't   | CURB RAMP EXISTS (FALSE/CHECKED)                                   |
| Curb Ramp     | CR_Issue15           | If curb ramp exists                   | CURB RAMP EXISTS (TRUE/CHECKED)     | and the width of the curb ramp is less than the width of the adjoining sidewalk         | SW_WIDTH>CR_RAMP_WID   |
| Driveways     | DW_Issue01           | If driveway exists                    | DRIVEWAY EXISTS (TRUE/CHECKED)      | and cross slope of sidewalk crossing driveway is <2%                                    | DW_CR_SLO_SW (>2%)   |

| Traffic Ops   | TO_Issue08           | If pedestrian push button is present  | TO_BUTTON (TRUE/CHECKED)            | and the push button is not operable   | TO_BTN_OP (FALSE/UNCHECKED)  |
| Traffic Ops   | TO_Issue09           | If pedestrian push button is present  | TO_BUTTON (TRUE/CHECKED)            | and the push button is not accessible   | TO_BTN_ACC (FALSE/UNCHECKED)                                       |
| Traffic Ops   | TO_Issue10           | If pedestrian push button is present  | TO_BUTTON (TRUE/CHECKED)            | and there is no push button sign present  | TO_BTN_SN (FALSE/UNCHECKED)  |
| Obstruction   | OB_Issue01           | If obstruction exists                 | OBSTRUCTION EXISTS (TRUE/CHECKED)   | and the obstruction is a sign   | OB_SIGN (TRUE/CHECKED)   |
| Obstruction   | OB_Issue02           | If obstruction exists                 | OBSTRUCTION EXISTS (TRUE/CHECKED)   | and the obstruction is a mailbox  | OB_MBOX (TRUE/CHECKED)   |
| Obstruction   | OB_Issue03           | If obstruction exists                 | OBSTRUCTION EXISTS (TRUE/CHECKED)   | and the obstruction is a fire hydrant   | OB_FHYD (TRUE/CHECKED)   |
| Obstruction   | OB_Issue04           | If obstruction exists                 | OBSTRUCTION EXISTS (TRUE/CHECKED)   | and the obstruction is a bench  | OB_BENCH (TRUE/CHECKED)  |
| Obstruction   | OB_Issue05           | If obstruction exists                 | OBSTRUCTION EXISTS (TRUE/CHECKED)   | and the obstruction is a telephone  | OB_TELE (TRUE/CHECKED)   |
| Obstruction   | OB_Issue06           | If obstruction exists                 | OBSTRUCTION EXISTS (TRUE/CHECKED)   | and the obstruction is a traffic signal box   | OB_TRSC (TRUE/CHECKED)   |
| Obstruction   | OB_Issue07           | If obstruction exists                 | OBSTRUCTION EXISTS (TRUE/CHECKED)   | and the obstruction is a newspaper box  | OB_NEWSB (TRUE/CHECKED)  |
| Obstruction   | OB_Issue08           | If obstruction exists                 | OBSTRUCTION EXISTS (TRUE/CHECKED)   | and the obstruction is a drainage structure   | OB_DRSTR (TRUE/CHECKED)  |
| Obstruction   | OB_Issue09           | If obstruction exists                 | OBSTRUCTION EXISTS (TRUE/CHECKED)   | and the obstruction is a tree grate   | OB_TRGR (TRUE/CHECKED)   |
| Obstruction   | OB_Issue10           | If obstruction exists                 | OBSTRUCTION EXISTS (TRUE/CHECKED)   | and the obstruction is a pole mounted object  | OB_POLE (TRUE/CHECKED)   |
| Obstruction   | OB_Issue11           | If obstruction exists                 | OBSTRUCTION EXISTS (TRUE/CHECKED)   | and the obstruction is standing water   | OB_WTR (TRUE/CHECKED)  |

### C.3. **Figure 1: How to Use the Index**

## Instructions

The purpose of the included index is to guide the user through the ADA deficiencies at each intersection location. The index lists the intersections in order of deficiency ratings for each group of inspection locations. An index for each set of intersection groups will be produced; Priority 1-5, Priority 6-10, Priority 11-15, and Priority 16-21. The applicable group is identified on the index in the top left corner.

| Priority 1-5 Intersections                  |                          |                   |        |                              |   |
|---|--------------------------|-------------------|--------|------------------------------|---|

Column “Phase I Priority Ranking” shows the ranking assigned to each intersection during the Project Area Determination.

- Intersections were included if they were signalized and maintained by Lee County and/or were intersections of arterial and/or major collector roadways.
- Intersections were then categorized as urban/suburban/rural.
- Prioritization of inspection locations for Phase I were rated in hierarchy by their vicinity within:
  1. 2 miles of an urban elementary school
  2. ½ mile of an urban middle school
  3. 2 miles of a suburban elementary school
  4. ½ mile of an urban high school
  5. ½ mile of a suburban middle school
  6. ½ mile of a suburban high school
  7. ½ mile of rural schools
  8. None of the above.

The lower the “Phase I Priority Ranking”, the higher the priority for planning necessary improvements.

Column “Deficiency Rating” shows the rating of the degree of ADA non compliance for each intersection. The higher the “Deficiency Rating”, the higher the degree of ADA non compliance.

This rating is calculated using Microsoft Access using the detailed inspection reports. Values are based off of the assignments from the “**Prioritization of Types of ADA Deficiencies**” table. These values are also identified on the index with a short description of the deficiency identified directly above.

| Priority 1-5 Intersections                  |                          |                   |         |             |                        |              |              |              |              |                        |

**Prioritization of Types of ADA Deficiencies**

**ATKINS**

| Priority Ranking | Type          | Scenario 1  | Scenario 2 | Value |
|------------------|---------------|---|------------|-------|
| 1                | Curb Ramp     | If curb ramp exists<br>but cross walk does not  |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and detectable warning surface is missing  |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and ramp grade is greater than 8.33%   |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and ramp width is <48"   |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and obstructions are located within the ramp   |            | 3     |
| 1                | Curb Ramp     | If curb ramp exists<br>and gutter slopes are greater than 5%  |            | 3     |
| 1                | Curb Ramp     | If sidewalk exists<br>and curb ramp doesn't   |            | 3     |
| 1                | Crosswalk     | If crosswalk exists<br>and curb ramp doesn't  |            | 3     |
| 1                | Median        | If median refuge exists<br>and no detectable warnings exist   |            | 3     |
| 1                | Refuge Island | If refuge island exists<br>and detectable warnings do not exist   |            | 3     |
| 1                | Refuge Island | If refuge island exists<br>and ramp slopes within island are not 8.33% or less  |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and clear width to obstruction is <36"  |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and sidewalk grade away from intersection is >8.33%   |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and sidewalk landing at top of ramp is not present  |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and there is a change in level surface along sidewalk greater than 1/4"                                   |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and there is a drop off greater than 4" on the front or back of side                                      |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and there are overhead obstructions along sidewalk less than 84"  |            | 3     |
| 1                | Sidewalk      | If sidewalk exists<br>and there are missing sections or gaps along the sidewalk greater than 1/2"                               |            | 3     |
| 1                | Traffic Ops   | If pedestrian push button is present<br>and distance from sidewalk to push button is not equal to or less than 10"              |            | 3     |
| 1                | Traffic Ops   | If pedestrian push button is present<br>and the push button is not operable   |            | 3     |
| 1                | Traffic Ops   | If pedestrian push button is present<br>and the push button is not accessible   |            | 3     |
| 2                | Curb Ramp     | If curb ramp exists<br>and doesn't extend full width  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and ramp cross slope is greater than 2%  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and detectable warning surface is <24" deep  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and detectable warning surface is deficient  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and ramp falls outside of marked crosswalks  |            | 2     |
| 2                | Curb Ramp     | If curb ramp exists<br>and the width of the curb ramp is less than the width of the adjoining sidewalk                          |            | 2     |
| 2                | Driveways     | If driveway exists<br>and cross slope of sidewalk crossing driveway is <2%  |            | 2     |
| 2                | Crosswalk     | If crosswalk exists<br>and crosswalk width is less than 6'  |            | 2     |
| 2                | Crosswalk     | If crosswalk exists<br>and pavement marking condition is poor   |            | 2     |
| 2                | Median        | If median refuge exists<br>and refuge width is <36"   |            | 2     |
| 2                | Refuge Island | If refuge island exists<br>and pavement marking condition of minor crosswalk is poor  |            | 2     |
| 2                | Refuge Island | If refuge island exists<br>and width of crosswalk from island to corner is <6'  |            | 2     |
| 2                | Refuge Island | If refuge island exists<br>and ramp cross slopes in island are not 2% or less   |            | 2     |
| 2                | Sidewalk      | If sidewalk exists<br>and width of sidewalk is <48"   |            | 2     |
| 2                | Sidewalk      | If sidewalk exists<br>and cross slope is >2%  |            | 2     |
| 2                | Sidewalk      | If sidewalk exists<br>and sidewalk condition is cracked or shattered  |            | 2     |
| 2                | Traffic Ops   | If pedestrian push button is present<br>and push buttons aren't within 60" of the applicable crosswalk line                     |            | 2     |
| 2                | Traffic Ops   | If pedestrian push button is present<br>and push button is not located within range of 30"-120" from curb line                  |            | 2     |
| 2                | Traffic Ops   | If pedestrian push button is present<br>and there is not a level space at the push button                                       |            | 2     |
| 2                | Traffic Ops   | If pedestrian push button is present<br>and there is no push button sign present  |            | 2     |
| 3                | Curb Ramp     | If curb ramp exists<br>and detectable warning surface is not contrasting  |            | 1     |
| 3                | Curb Ramp     | If curb ramp flare slopes are present<br>and curb ramp flare slopes are greater than 8.33%                                      |            | 1     |
| 3                | Driveways     | If driveway exists<br>and driveway condition is cracked or shattered  |            | 1     |
| 3                | Crosswalk     | If crosswalk exists<br>and crosswalk cross slope is >2%   |            | 1     |
| 3                | Crosswalk     | If crosswalk exists<br>and 48" extension in crosswalk for diagonal crossing does not exist                                      |            | 1     |
| 3                | Sidewalk      | If no sidewalk exists<br>and there is obvious evidence of pedestrian use  |            | 1     |
| 3                | Traffic Ops   | If pedestrian push button is present<br>and push buttons are within 120" of other push buttons                                  |            | 1     |
| 3                | Traffic Ops   | If pedestrian push button is present<br>and push button is not parallel to the applicable direction of crossing                 |            | 1     |
| 3                | Traffic Ops   | If pedestrian push button is present<br>and the height from the sidewalk to the center of the push button is not within 42"-48" |            | 1     |

The deficiency rating is the sum of all the type deficiencies found (whether related to curb ramps, crosswalks, sidewalks, medians, refuge islands, traffic operations, driveways, etc.). Note, the total in each box applies to the total of each type of deficiency at each intersection.

For example, on intersection 3304 – Cypress Lake Dr. & Winkler Rd., there is an “8” in the box for CR\_Issue10 which is when a curb ramp exists and the ramp width is <48”. Since this type of deficiency has a value of “2” assigned to it, we can ascertain that there are a total of 4 instances (8 divided by 2) at this intersection where a curb ramp is less than 48” wide.

| Priority 1-5 Intersections                 |                          |                   | Value Assigned to Deficiency | Curb Ramp Deficiencies |            |            |            |            |            |            |            |            |            |            |            | Crosswalk Deficiencies |            |            |            |            |            |

The user may choose to look at specific columns of the index, OR can reference the “**Findings and Recommendations for ADA Compliance**” which has been generated for each intersection. These reports summarize the existing conditions and list the recommendation of improvements at each location. The intersection reports that follow include:

- A findings/recommendation summary
- Inspection photos
- Intersection sketch
- The detailed inspection report

These reports are placed in the binder in the order that they are listed on the applicable index.
