

Say
Hello to
AMI!

Your new Water Utility assistant

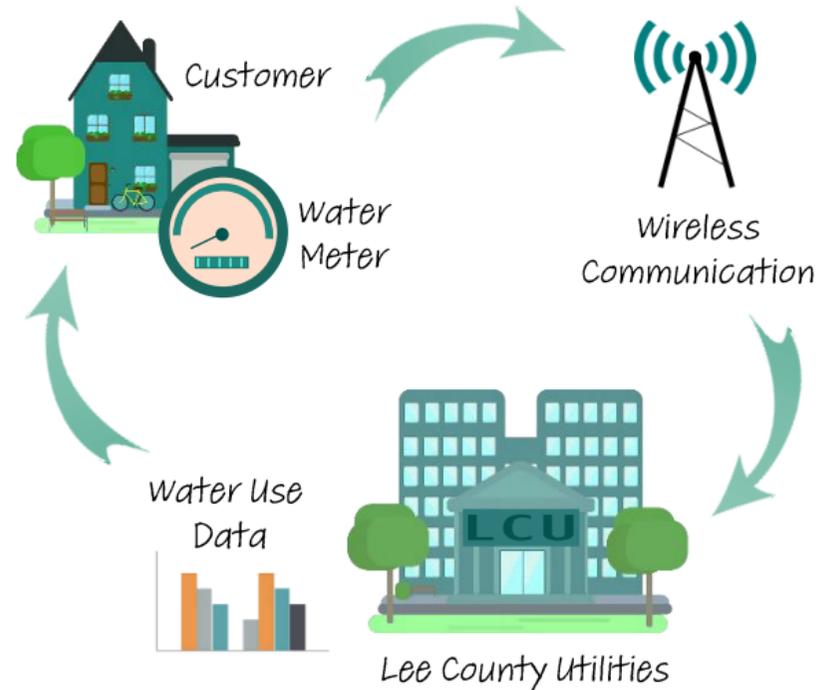

What is AMI?

Advanced Metering Infrastructure (AMI) is technology that helps our water customers.

How it works:

- Your smart water meter sends water usage information directly to Lee County Utilities.
- Customers access data through the customer web portal.
 - ✓ Receive notifications on your phone
 - ✓ Pay your bill on the customer portal
- Smart water meters transmit hourly water usage data over a wireless network.
 - ✓ Secure access to your water consumption information
 - ✓ Set alerts to identify problems more quickly
 - ✓ Avoid unintentional high water consumption

How it all works
